Skills/Frameworks/Tools

Typescript, React JS, Next JS, Tailwind CSS, Git, Firebase, Chakra UI, Git Actions, CI/CD, Microsoft SQL Server,

Python, HTML, CSS, Javascript, SQLite, Java, MySQL

Experience

July 2023 till Date
INCOVER - *Frontend Developer - Typescript, Next JS*

Worked in a team of developers in development process by translating Figma designs into pixel-perfect, responsive code.

- Collaborated with UX designers and backend developers to develop and maintain high quality web applications.
- Ensured the smooth integration of Frontend and backend components, improving overall website functionality.
- Added new features and functionalities across various devices and screen sizes to enhance the overall user experience and satisfaction.
- Conducted regular code reviews and implemented best practices to optimize website performance and maintain code quality.
- Utilized modern frameworks and libraries to create dynamic and interactive user interfaces and websites, improving overall website functionality and engagement.
- Contributed to testing processes, focusing on continuous feature improvement and bug fixes, underscoring a commitment to enhancing testing processes and refining user experience.
- Translated Figma designs into implement pixel-perfect, responsive code, enhancing user experiences across devices and screen sizes.

April 2024 - till Date
Yara - Pecon Global - *Frontend Developer (Contract) - HTML5, CSS3, Javascript*

- Converted Figma designs into high-quality, responsive HTML, CSS, and JavaScript code, ensuring seamless user experiences.
- Implemented user flows and interactive features to enhance website functionality and user engagement.
- Ensured responsiveness of web applications across various devices and screen sizes.
- Debugged and resolved issues to maintain optimal website performance and user satisfaction.
- Ensured successful integration of Frontend components with backend systems.

July 2021 - September 2023
NIIT Limited - *Trainee Software Developer - Microsoft SQL Server, Python, SQLite, HTML5, CSS3, Javascript, Java, MySQL*

As a trainee software developer, I embarked on an dynamic journey through the multifaceted realm of modern technology, where each project served as a testament to my unwavering dedication to excellence and innovation.

- Data Management - I developed proficiency in database management systems, like Microsoft SQL Server, SQLite, and MySQL.

- I used Python as a tool of choice for automation and innovation. Significantly, I participated in the development of a Champions League (football/soccer) simulation system, which features team data, match outcomes and CSV-recorded scores for an interactive football experience.
- Created user-centric web designs using HTML, CSS, and Javascript, contributing to the development of a massage therapy website, where I carried out the following tasks.
  - Implemented scheduling and booking functionality for massage sessions, ensuring efficient management of appointments.
  - Integrated home delivery features, for enhanced users experience.
  - Optimized user experience and website responsiveness.
- While exploring Java's versatility, I led the development of a secure Java Swing banking application under the following tasks.
  - Integrated MySQL for secure data storage and retrieval of user data and transaction management.
  - Implemented transaction and utility payment functionalities within the application, allowing the users to perform various banking transactions seamlessly, and convenient settlement of bills.
  - Implemented robust authentication mechanisms to safeguard user accounts.
  - Incorporated a feature that allows users to access real-time records of previous transactions and payments, providing comprehensive visibility into their financial activities within the application.

Education

2021 - 2023

NIIT Limited, Lagos, Nigeria

Software Development - Full Stack

2015 - 2019

University of Ilorin, Ilorin, Nigeria

BSc. Geography and Environmental Management

Other Projects
- Developed a dynamic school website with React, Tailwind CSS, Firebase, and Chakra UI. It features role-based access and authentication, school fee payment, teacher and course management, and assignments/tests assignments for streamlines school operations.
- Developed and translated Figma designs into a pixel-perfect user interface for a digital platform that facilitates seamless leasing and management of medical equipment, enhancing user experience and visual appeal.
