

Obaloluwa Tubi

Frontend Developer | UI/UX Implementation Expert

Email: tubiobaloluwa@gmail.com | Github: <https://github.com/TubiOb> | Portfolio: <https://tubiob.netlify.app>

Core Technical Skills

- Frontend Technologies: React JS, Next JS, Typescript, Javascript (ES6+), HTML5, CSS3.
- Styling Frameworks: Tailwind CSS, Chakra UI, Responsive Design, Mobile-First Development.
- Rich Text & Animations: Tiptap Rich Editor, Framer Motion.
- Development Tools: Git, Github Actions, CI/CD Pipelines, Code Reviews, Vite.
- Form Validation: Yup Schema Validation, Zod Schema Validation, Error Handling.
- Backend Integration: RESTful APIs, Firebase, Database Management, Real-time Synchronization.
- Additional Technologies: Python, Java, Microsoft SQL Server, MySQL, SQLite.
- Development Practices: Test Driven Development, Performance Optimization.

Professional Experience

July 2023 - Present

Incover Solution | *Frontend Developer* | *Typescript, Next JS*

- Worked in a team of developers in the development process of responsive web applications using React.js, Next.js, and Typescript, serving 10,000+ active users.
- Collaborated with UI/UX designers and backend developers in cross-functional agile teams.
- Optimized application performance through code splitting and lazy loading, reducing load times by 40%.
- Conducted comprehensive code reviews and established frontend development best practices.
- Integrated RESTful APIs and managed state using modern React patterns and hooks.
- Ensured cross-browser compatibility and mobile responsiveness across all device types..
- Translated Figma designs into pixel-perfect, responsive code, enhancing user experiences by 25%.

April 2024 - August 2024, April 2025 - June 2025

Yara-Pecon Global | *Frontend Developer (Contract)* | *HTML5, CSS3, Javascript, React JS, Typescript, Tailwind CSS, Axios, Shadcn*

- Converted complex Figma designs into production ready HTML5, CSS3, JavaScript, React, and Typescript applications.
- Implemented interactive user interfaces with a focus on accessibility and compliance with web standards.
- Developed responsive layouts using CSS Grid, Flexbox, and modern CSS techniques.
- Debugged and resolved cross browser compatibility issues, ensuring consistent user experience.
- Collaborated with backend teams to integrate Frontend components with server side systems.

July 2021 - September 2023

NIIT Limited | *Trainee Software Developer* | *Microsoft SQL Server, Python, SQLite, HTML5, CSS3, Javascript, Java, MySQL*

As a trainee software developer, I embarked on a dynamic journey through the multifaceted realm of modern technology, where each project served as a testament to my unwavering dedication to excellence and innovation.

- Built full-stack web applications using HTML5, CSS3, JavaScript, and database technologies.
- Developed a Champions League (football/soccer) simulation system with Python, which featured data visualization, and CSV processing.
- Created a massage therapy booking website, with scheduling functionality and payment integration.
- Designed and implemented secure Java Swing banking application with MySQL database integration.
- Gained proficiency in database design and management using Microsoft SQL Server, MySQL, and SQLite.
- Implemented user authentication systems and transaction management features.

Education

Software Development - Full Stack | **NIIT Limited, Lagos, Nigeria** | 2021 - 2023

BSc. Geography and Environmental Management | **University of Ilorin, Ilorin, Nigeria** | 2015 - 2019

Key Projects

PlayCV - Professional Video CV Platform | *Typescript, Axios, MUI, Paystack API, Tiptap Rich Editor, Cloudflare, NX, Yarn, Zod*

- Developed dual platform web application connecting Nigerian skilled professionals with employers through video CVs.
- Built comprehensive monetization system with Paystack API integration for professional subscriptions and employer access fees.
- Implemented secure video upload and streaming using Cloudflare integration for optimized content delivery.
- Created multi-role authentication system supporting professionals, employers, and administrators with role-based permissions.
- Designed admin dashboard for content management, user approvals, pricing controls, and job vacancy oversight.
- Organized scalable monorepo structure using NX workspace for efficient code sharing and deployment.
- Achieved 40% faster API response times through optimized Axios interceptors and request caching.
- Established robust form validation using Zod schema validation for data integrity across all user inputs.
- Implemented automated content moderation and approval workflows for video CV submissions.

LearnNest - School Management System | *React JS, Firebase, Paystack API, Tailwind CSS, and Chakra UI*

- Developed a comprehensive school management platform with role-based access and authentication.
- Implemented secure payment processing using Paystack API for school fee collection and transactions.
- Implemented student enrollment, fee payment processing, and course management modules.
- Created teacher dashboard, with assignment distribution and grade management capabilities.
- Integrated Firebase for real-time data synchronization and user authentication.

Hivehub - Publishing Platform | *Typescript, Chakra UI, Firebase, Tiptap Rich Editor, Framer Motion, Vite*

- Collaborated to build an open publishing platform, inspired by Medium for connecting writers with readers, through storytelling.
- Implemented advanced rich text editor using Tiptap with real-time collaborative capabilities.
- Integrated Firebase Authentication and Firestore for user management and content storage.
- Designed smooth animations and micro interactions using Framer Motion for enhanced user engagement.

Memomaze - Note Taking Application | *React JS, Yup, Tailwind CSS, Sonner React Toast, Firebase, Github Actions*

- Developed a minimalist note taking web application inspired by Google Keep, with real time synchronization.
- Built intuitive search functionality with advanced filtering and label-based organization system.
- Implemented form validation using Yup schema validation for data integrity and user experience.
- Created responsive design ensuring seamless access across desktop, tablet, and mobile devices.
- Integrated Sonner React Toast for elegant user notifications and feedback systems.
- Established CI/CD pipeline using Github Actions for automated testing and deployment.
